Comments: Thank you for the opportunity to provide comment on this proposal. I have two main concerns. First the scope, scale and intensity of new development proposed at Holland Lake would ruin the character and historical use of the site. The proposal is tone-deaf and out of sync with both the culture and environment of the location.

Two, I was taken aback by the extraordinarily biased commentary from the Forest Supervisor when the scoping letter and press release were first issued. His language was so lopsided--the new Colorado-style development of Holland Lake was presented as if it was something residents of Westwrn Montana want, which has zero basis in fact or evidence, and he telegraphed that the decision was already made. This is a breach of trust by a Agency Administrator. I generally defer to the professional judgement of our USFS leaders, but this was such an over the top example of a "back room deal" I can not let it pass.
