Title:

Comments: This proposed "upgrade" to this Holland Lake property will drastically alter every aspect of this historical Montana Treasure. The buildings will be destroyed and replaced with multiple larger structures impacting the communities of Swan Valley significantly. The project needs to under go an EIS for both habitat and wild life, an evaluation of sustainable water and wastewater treatment, as well as a traffic review. The impact on the Swan Valley communities as well as the proposal to expand onto public lands warrants an extensive review process and public input.

As stewards of our state and representatives of Montana residents you can do no less then scrutinize this project and insure Holland Lake will be preserved as the very special place it is.
