Comments: The impact of this massive expansion will ruin one of our state's greatest treasures. More traffic, more people, so much more waste water so close the cleanest clearest lake most folks have ever seen. And then to imply that you are doing us, Montanans a favor by allowing us to spend absurd amount of money to stay there while destroying our lake. Impacting our recreation and enjoyment by flooding it with more people, more traffic, more waste, less peace, less solitude, less waterlife, less trees, less view.

I say you knew what the place was when you leased it and that's what it should remain. How is it that that they can expand to include RVs when other places leasing from the Forest Service it specifically prohibits RVs? Changing the terms of a lease of public property should require the consent of the public. It should also be the public that determines if it's in our interest not up to the feller that is out to profit to tell us.

I strongly OPPOSE any expansion.
