Comments: So sad to see an unspoiled gem become another business transaction. This gentrification is absolutely disgusting. The U.S. Forestry should know better than to hand off our public lands to another corporation that will use it for their own gain and most likely destroy it in the long term. Not only will the community suffer, the wildlife and its ecosystem will suffer twice as much. I hope to see this land flourish and be kept in great conditions for the rest of my life. Stop selling Montana.
