Title:

Comments: We do not need to look far in any direction to see how these type of expansion projects by resort companies negatively impact communities. ex Big Sky MT. The development in Big Sky has polluted the Gallatin River and its own municipal water sources. Teachers, medical providers, young families. workers critical to the operations of the resort can not afford to live in Big Sky. While this company will promise this or that whatever they think they need to gain approval, based on past experience chances are slim they will honor those promises. Let's make a choice to preserve wildlife habitat and access tot he public rather than selling off Montana piece by piece.
