Title:

Comments: I believe the Forest Service has forgotten who it is they are supposed to represent. Our National Forest is for all U.S. citizens, not just the wealthy ones. I vehemently oppose this theft of property by wealthy investors which will actually continue to cost taxpayers well into the future, in fact this scam will cost us indefinitely into the future. Also, I don't believe stealing pristine land from its rightful owners to provide profits for ONE CORPORATE ENTITY is how the forest service should be doing its job!!

Please do not allow this theft of property to continue as we (taxpayers), are sick and tired of being treated like we don't matter. At the very least, go through the normal environmental impacts the project will have on this beautiful serene Eden in Montana.

Thank you for your attention on this very important issue.
