First name: Mitchell

Last name: Martishius

Organization: Montana Block Company

Title:

Comments: Hello,

Our Public Lands in Montana represent and protect one of the last wild and free areas in the United States. The East Coast has been overrun by developers and human habitation. Allowing a large company to further expand their encroachment on our Public Lands is an affront we cannot allow. Our company firmly stands against wealthy interest destroying our public Lands for personal gain. Anyone who allows this to happen should be ashamed of themselves. This is the exploitation of a protected resource by those who only care about profits. It cannot be allowed to happen, and if it does, those who pass this measure should be held accountable by the people.

Thank you.
