Title:

Comments: I have been reading many personal and eloquent comments from people who are very connected to this special, unique place, and very concerned about the potential loss of an area that is so important to so many of us, and VITAL to the health of the wildlife that live there. Over the past 42 years, my family and I have camped, paddled, hiked to the falls, started backpacking trips, enjoyed meals at the lodge, and experienced the beauty and silence of Holland Lake. I oppose this expansion and request that further research is done to evaluate the devastating impact this project will have on the land and wildlife that depend on this area. Thank you.
