Comments: I am writing in opposition to POWDR's plans for extensive development on public land.

Once land is developed it cannot be returned to its original state and I have grave concerns about what this development would mean for the land and animal species dependent upon it. It would also negatively impact the communities there that already have limited resources and would stress the roadway.

It is important for the Forest Service to do a more rigorous environmental impact statement rather than a less stringent analysis (categorical exclusion), and deny the Special Use Permit for this giant project because it's not in the public interest.

Please save Holland Lake from development that will threaten part of Montana's treasured environment.
