Title:

Comments: I'm concerned about this project because of the effects to the environment. A year-round venue will hurt the environment. This property is one of the last treasures Montana still has. Selling out to an out of state company is the wrong thing to do. Why do we have to keep losing our beloved treasurers to out-of-state companies who want to cut the property up?

We should be leaving treasures for our children and grandchildren instead of selling them to the highest bidder.
