Title:

Comments: Please do not approve the lease. There has been so much opposition to this proposal and the original lease agreement is only for 10.5 acres. The forest service has not been transparent in its process. Further study and the impact of this large expansion project needs to be done. You have heard the tax payers speak. This is public land and the forest service works for all the people not just for the wealthy. Please reconsider approving this project! This is something you will go down in history for doing. Make it something your grandchildren and great grandchildren can be proud of!
