Comments: While the surrounds of Holland Lake are evolving, renovation and improvement of Holland Lake Lodge facilities is reasonable and should be welcomed - within context of its existing "micro-environment" footprint.

However, the proposal indicates a wholesale transformation of the lodge into a high congestion, high traffic, high sound decibel and high maintenance facility. The size and scope, and perhaps exclusivity, of this project will promptly and forever extinguish the remaining peace and serenity of Holland Lake, its campgrounds, visitors, local residents and the surrounding forest environment.
