Comments: I am incredibly disappointed in the USFS for allowing this corporate conglomerate to destroy the character and environment of a lake that we all cherish so deeply. Not only are they allowing this egregious development but they are letting the business developers bend the rules that we as lessees are all required to obey. Additionally, it is terrible that the access to this treasure is being limited to only those who can afford luxury resort lodging-which is exponentially more expensive than the campground and current lodge. If the USFS cares about accessibility and environmental protection, they must block this Special Interest Permit in the name of public interest. Don't let this be another example of our beautiful wilderness falling to corporate greed.
