Comments: I join the thousands of Montanans and American public saying "No" to the proposed Holland Lake Lodge expansion. I completely and vehemently oppose the expansion of this private, commercial resort on Forest Service land. Those of us that love and recreate in the pristine Swan Valley DO NOT WANT THIS! There is already an abundance of high-end lodging and luxury resorts in the areas surrounding Holland Lake. The sensitive habitat and wilderness area at Holland Lake already face immense pressure from increased hiking to the waterfall and recreating on the lake. This proposal is submitted under a categorical exclusion (CE) the lowest level of National Environmental Policy Act. Allowing this development and expansion with minimal consideration or scrutiny of the environmental impacts to a unique and pristine wilderness area would set an alarming precedent in Montana. Montana is not for sale to the highest bidder and I am disappointed in the Forest Service for trying to rush this project through without proper comment, research and consideration.
