Comments: Please consider my objection to this "improvements" project. As a Montanan who has long enjoyed peaceful days at Holland Lake and access to the Bob Marshall, I am concerned that this expansion would degrade the visitor experience and harm the surrounding environment. When weighing the decision, it is clear to me that this project has no need to be approved as the drawbacks clearly outweigh the perceived benefits. There has to be a time when endless human development and expansion into Forest Service lands -and the entryway to the largest contiguous wilderness in the lower 48 - due to greed to pull in tourists' dollars must stop. Consider future generations. I want my grandchildren to experience the true Holland Lake, not some POWDR Disneyland version.
