Comments: My family has been enjoying this part of the Swan Valley since 1957. I now have a home here and spend the majority of the year.

It has taken ten of thousands of years to make this beautiful area including spectacular Holland Lake. I do not want to see POWDR or any developer come in and in a matter of a year or two change what Mother Nature has given us. I am also a realist and understand that money is the driving factor and it is imperative to require a full environmental impact statement.

I also understand the Forest Service/USDA hold the most power in this decision since they control the rights to the land and it's use. Since they represent the public, I encourage them to take careful counsel and represent all of us in our best interest.
