Comments: I write to express my opposition to the proposed resort development on the banks of Holland Lake. There has never been a more important time as now for the collective voice of all of the Lorax near and far to speak for Holland Lake and to shout out a resounding "NO" to this Oncler in the form of a big rich out-of-state resort developer. The proposed resort development does not make good sense. It will threaten many tangible and intangible cultural ecosystem services that Holland Lake provides. Furthermore, it is a resort for the wealthy and is one more example of the potential for the majority of people who medium and low income to be marginalized and excluded from a very special place. The public good is at stake and is threatened by this power play.

I oppose any development on Holland Lake without thorough multi-agency environmental review and a well-conceived public process.
