Title:

Comments: The reason most of us live in this valley is because we like very rural type of lifestyle. My wife's family homesteaded here in the 20's with many of the buildings and cabins still the same. We are not about change. You nor any of the people on your side of the table live here. It's no skin off your back, your not the one dealing with ,if you let this go through the destruction of Holland Lake and for that matter the Swan Valley as we have known it for the last 100 years. Our trailheads and back country is already being used to death. What's your plan for the parade of people and toilet paper that's going to lead you to Holland Falls or the Old Holland Lookout, our trails, pristine lakes, and roadside turnouts have become nothing more than a latrine for the herds of look at me, it's all about me people who don't give a dam about our valley. How about we do something like this in your backyard or a place that's already been destroyed. What's your plan for pumping all the extra sewage from all the new buildings to the treatment area, what if there is a pump failure is there a backup or does it just overflow into the lake ,are the buildings going to be sprinklered. There are so many unanswered questions. If this goes through my children and grandchildren's lives as they have known it here will change forever and not for the better. This will be the beginning of the end for the Swan ,
