Comments: i am an interested person. please regard me as an interested person in your plan. the forests of america are being marauded by the fs and not protected as they should. we need to stop the logging. you cant keep planting and marauding and logging. the usdda is not fit agency to be in charge of environment. the usda is a farming gency and farmers dont give one rats ass about the environment and want to destroy forests and nature and animals. every single day they call for logging forests and killing animals.
