Comments: As an avid public lands user I would love to see these improvements undertaken in this area. Top priorities to me are the maintenance of the existing trails and the potential of new downhill mountain bike trails. I enjoy the existing trails and definitely know they need a great deal of upkeep especially after all the rain we have gotten this summer. New trails would also greatly benefit the community and create basis for more sanctioned downhill specific events trails in the area reducing the amount of pirate trails that could pop up.

Another important development would be the proposed connector trail from junction creek to falls creek. This would benefit all trail users and also alleviate the congestion on the Colorado trail. In addition to this a groomed surface for fat bikers or other winter recreation would increase benefits to the community and create more options for locals and tourists alike.

Finally fire mitigation throughout the area along with wetland management will create a better ecosystem for wildlife and a safe buffer to our beloved town. I'm a fly fisher and have loved exploring the creek but it is very difficult to fish with overgrown banks, a restoration project would have a positive impact on the wildlife and recreation opportunities in this area.

Overall we have a opportunity that cannot be overlooked, a benefit to the town, culture community and natural ecosystems should be taken advantage of. I would donate time and energy to gaining support to contribute to this cause.
