Title:

Comments: As an avid (weekly) recreational user of all resources in the proposal I suggest the following:

Please allow the development of both downhill trails proposed in Junction Creek as well as the allowance of class 1 e-bikes on all system trails.

I support the winter grooming proposal and it would be a wonderful addition to the non-competitive Nordic and fat-tired bike users.

Please allow sufficient loop options in the Falls Creek trails selection which provide for enjoyable foot traffic and bicycle loop experiences while avoiding priceless cultural resources.

I support the addition of any educational experiences such as the proposed signage at Parrot Homestead site and any other First Nation's historical sites with the approval of representative Tribes.

Please allow for a connection trail from Falls Creek/Hidden Valley to County Road 203 both on the north and south ends of the system. The proposed emergency right of way would be perfect for this use on the North end.

Please allow for a connection trail from Falls Creek/Hidden Valley road to the Log Chutes trail system.

The realignment and maintenance of the Steiner ditch is imperative to preserve resources during wet springs. Additionally, trail realignment and/or armoring would be useful in preventing seasonal damage.
