Comments: Please consider further trail development in the Log Chutes area to expand user opportunities in a convenient area that is already and continuously impacted by timber operations such as additional single track links of the existing skid roads and single tracks parallel to the existing road/trails.

Please prioritize a Hermosa Creek trail to Colorado trail, trail connection. The southernmost 4 trails that provided this were lost to cyclist in the Hermosa Wilderness establishment and lost to foot travel when these trails were subsequently abandoned to foot travel. Many cyclists supported the HCW bill at the expense of many backcountry trails to their own use and one of the contingencies to this support was a new southern connection between CT and HCT. Follow through on this intention significantly informs support for additional Wilderness bills as well as other FS conservation efforts in the future.
