Comments: 1. Please allow for the specific Log Chutes downhill mountain bike trails both to rehab on-the-ground trails and to build 3 to 4 new trails utilizing 400 feet of center line of some of the proposed downhill trails. Machine built downhill specific trails would be a great asset to our community.

Yes I think this would be very beneficial to the cycling community. Durango is a cycling mecca but a criticism that I do have is Durango is lacking on the gravity side of trail infrastructure. I think the only reason we have yet to produce just as many gravity stars as endurance stars is because of the lack of places that encourage that kind of riding. We are limited in where to go when we want to hit jumps, ride a directional trail, and be challenged in a safe progressive way.

We need more spaces like down and out, and browns ridge that is a safe, progressive, and inviting place for that type of riding. The new trails at junction creek could be a great step in the right direction when it comes to addressing more directional, progressive, downhill styled trails. The cycling community is hungry for more of the riding that has features, obstacles and places to do that style of riding.
