Comments: My family has owned property on Carbon Creek Road for thirty years. In the last decade traffic on the road has increased and within the last five years increased exponentially. Jon Hare met with us by the road and in that short period of time saw multiple vehicles driving back-and -forth. I recognize that Gunnison County does need more recreational areas for the public and support that endeavor. However, we have strong concerns that the project could increase trespassing on our property. Private property should be respected. There have been camping/parking violations previously. If the Forest Service proceeds with the project for Three Peaks Ranch, we would be in support if there were adequate parking for all recreation enthusiasts that would utilize it. Also if it is to be preserved as a wildlife habitat then we suggest recreational vehicles not be part of the usage. Not only would the noise and disturbance to the habitat but the increased parking for some types of recreational vehicles could cause issues. We would certainly welcome any enhanced maintenance of the north end of Carbon Creek Road as well as the Red Mountain Road Thank you for meeting with us last week and thank you for considering these comments.
