Comments: We would like to see a comprehensive plan to develop and complete PN National Scenic Trail as an enduring long-term asset for the region - much like the PCT. We have talked to backpackers that have hiked parts of the trail and have had a hard time following the trail in places. If a plan could be developed there are plenty of resources that could, over time, complete and maintain the trail fairly inexpensively. Specifically, the Washington Trails Association has the resources and knowledge to fully complete missing parts the trail over time and then maintain it into the future. As long-time WTA volunteers, we would love to work on this project.
