Title:

Comments: Thank you for the opportunity to comment on the Junction Creek/Falls Creek project. I have serious concerns about the safety of CR 204 as the only access point to both of these area's. CR 204 has become increasingly busy over the past 10 years with more motor vehicles and cyclists. There is also the wildlife population to consider.

The other point, is chip sealing the FS Road from the Colorado trailhead to the Animas Overlook. As it is, vehicles drive very fast on the dirt road. Chip sealing will only increase that as well, as well as an increase in accessibility and more traffic.

Thank you, Bridget Wehmeyer
