Comments: I oppose SPLAT. Yellowstone wildlife deserve, at the very least a careful impact analysis. There appears to be a lack of concern by the Forrest Service about the impact of prescribed burns along highways to both drivers and wildlife. The irony that the name of this project is "Splat" does not escape me as this is exactly what could happen to both drivers and wildlife. The impact oon wildlife for the proposed of roads, bulldozing and burning of 23 square miles of prime wildlife cannot be overstated.
