Comments: I go to Yellowstone and the surrounding area a couple of times a year. I go specifically to see wildlife like wolves, bears, and bison - all animals who need to roam beyond the park's borders to survive. I am complete aghast and against the proposal to clear-cut such a large area. The idea is deplorable and preposterous. I can't believe USFS would consider this so close to a national park harboring threatened and endangered species. I urge you to cancel this tax-payer funded initiative. It is outrageous that it is even being considered.
