Comments: Thank you for giving me the opportunity to share my thoughts and comments regarding the Archer Knob Project. Proper habitat management is vital to our efforts to maintain and increase diversified wildlife and enjoyment of wildlife within our parks now and into the future. I am an avid hiker, hunter, fisherman, and wildlife conservationist. Early succession Forest and grasslands are extremely important to wildlife and our outdoor sporting lifestyle. I am 68 years old and fondly remember when my father and I hiked, hunted and fished together during the 1960s and 1970s when quail, ruffed grouse and other wildlife dependent on early succession forest and grasslands were so much more plentiful. I am hopeful I can share similar outdoor experiences with my grandson.
