Title:

Comments: Pisgah NF is wasted as an old growth forest I try to grouse hunt with Brittanys but is just a hike because no birds are present I think selective logging is a start but also open up the access roads in winter so people can hunt is important something as simple as planting clover on roads and planting food plots along roads think crab apples and other food supply's could help I'll not live long enough to see it but this would be a wonderful thing for NC.
