Hello and thank you for this opportunity to express my opinion:

I would like the South Plateau Area Landscape Treatment Project #57353 to be withdrawn and an EIS prepared and that bears, moose, elk, wolverine and pine marten be given priority here in the Greater Yellowstone Ecosystem. I demand that NO NEW ROADS be built; we've paved enough of our planet's surface. Let's focus on maintaining the roads the have and on sustaining the remaining natural environment in its pristine state. I look forward to your response.
