Title:

Comments: Your finding "no significant impact" of your plan for "major vegetative treatments" over 15 years in an area of wildlife corridors near and/or in Yellowstone is laughable and shows your disregard and/or ignorance about the precious wildlife such a plan will endanger. The world loves Yellowstone. The world loves Yellowstone's glorious wildlife. Your plan is an affront that will forever change and endanger these precious species. As an author of five books set in Yellowstone, and someone who has lived and worked there, I'm appalled and respectfully ask that you listen to more voices, do more research, come up with an alternate plan.
