Comments: I applaud the effort to try and solve some of the access problems in the Crazies. Thank you for the effort. Here are a few thoughts... I would like to make sure this stays administrative throughout the process. Some deed restrictions on the land from public to private are important. This will ensure the habitat will remain as intact as possible. Other options could be to use LWCF fund money to do the trail work, and take the Yellowstone Club money and buy more private inholdings on the east side and make it public. I would be willing to sit and talk through this with your office. Thanks again for all you do. John Salazar
