Comments: Good morning!

I am in support of the concept and implementation of the Pacific Northwest Scenic Trail. I do have a concern that I did not see answered in the documents. I am a frequent trail user both mtn biking and hiking and I am in support of the widening of the trail network across the US.

I downloaded the maps of the proposed trail and like the idea of the Glacier to Pacific connection.

My concern arises from user practicality. The trail does not appear to pass near to many towns where the user could access the trail. When I think of the PCT, I can name multiple entry points near enough to towns where users can get to a section of the trail

I know that this trail provides a different kind of opportunity that I am excited about, and I want to be able to use it in its entirety. Even as athletic as I am, I will need some chunking and access along the way... What is the practical plan for user access?

Thank you for your work on this opportunity! Much appreciated!

Regards,

Gail Danner
