Comments: To Whom It May Concern,

I have been involved in river trips for over 25 years. Many have occurred on the Main Salmon River in Idaho. The South Fork of the Salmon feeds into the Main. I have had the pleasure of camping and hiking up the South Fork many times.

It is a beautiful, stunning, pristine river. My hope is that you choose to keep it that way.

I have seen the San Juan River in Utah contaminated due to mining.

There are fewer and fewer public places to go that provide clean air and water.

I hope you choose to leave it that way.

Please consider an extension on the 75-day public comment period. I believe doing so would allow for more time to better understand the impact on the area and more information allows for better decisions.

I appreciate your time and wish you the best in making such an impactful decision on an incredible river.
