Comments: I'm 80. With the non -logging that the USFS has been preaching for years, it looks like another Great Fire of 1910 is coming soon. The getaways from your ridiculous spring burns happen too often, and i have seen this in CA and ID. The answer today is the same as it was after 1910, LOG THE FOREST. Burning it just makes pollution and of course those OOPS fires you have every year.
