Comments: Please go forward with this project with the allotted number of cycling trail miles proposed. The Prineville area is growing rapidly and along with it is an increased cycling community. A consolidated system of trails is needed to mitigate the impact of bicycles on areas surrounding Prineville, and Lemon Gulch provides an ideal location. Equestrian and hiking trail users will have minimal contact with cyclists, and wildlife will make adjustments to avoid all users. I look forward to bringing my children to this trail system when it is established and built!
