Title:

Comments: Living out of state currently has prevent me from coming to your meetings in regards to Jellico Creek. I do have a couple of questions like coal mining years ago they left the country side bald I am wondering if the forestry service intends on re-planting native trees and shrubs where they are going to log? I also would like to know is the purpose of the logging is it strictly financial and if so who is getting the money? Also how safe will the ground be in the future, with the amount of rain and mudslides? I Also want to voice my concern about the pesticides that are going to be used and ending up potentially in our water tables and drinking water as well as the damage to fish deer and other wildlife in my opinion this is ruining the landscape of the great commonwealth of Kentucky and all of its beauty. Thank you Connie Moses Hatland
