Comments: I am very concerned about this project. My farm joins the prescribed area on Osborne Creek. I have close to 150 acres. Osborne creek flows out of this mountain through the middle of my farm. According to the map most of the mountains will be clear cut behind my farm. I understand there may be a need to select cut and I do not have issue with that but I have very much an issue with clear cutting. From my experience this mountain will become an eyesore to look at. Actually I k is it will be. The creek will have constant silk running through it And then the danger of mud slides. They done basically this same project on the mtn behind my fathers farm in Tennessee. It is a nasty mess. One can not even navigate through what use to be forest. And the worst part was the flooding and mudslides that it caused. Homes and personal property were lost when the spring rain came. Lawsuits are still going on from home owners. I am against any form of clear cutting. Very very concerned.
