Comments: I strongly and passionately disagree with this project and believe it should be abandoned immediately. This plan is an encroachment on the rights of nature and wildlife within that area. We already take away enough of their peace of mind with over developing for residential or commercial use, we consistently put them in fear by slaughtering as many as possible every hunting season, we consistently burn down their habitats due to idiocracy and complacency. The amount of trash that bikers and hikers toss out is absurd and will destroy the area even more....also this seems like its solely being done because the person in charge rides mountain bikes...he needs to be removed from his position for this bad idea that only benefits his tiny group of people.
