Title:

Comments: Dear Sir or Madam:

I am writing in support of the most expansive (in terms of trail miles) proposal for the Lemon Gulch mountain biking project. The project would reduce user conflict, improve human impact on the Ochoco ecosystem (via installation of pit toilets and concentration of use along known corridors where an EIS has been performed) and provide economic benefit to a region of Eastern Oregon that is need of it. I draw your attention to the fact that many of the individuals and organizations now voicing their opposition to the project were 100% behind it before Donald Trump became president. I suspect their opposition is not grounded in science or economics, but in politics.

Very respectfully,

Jamie Collins, Ph.D.

Bend, Oregon
