Comments: Hi, I fully support the Lemon Gulch trail system. Multiple trail groups recognize the value of designating this new trail system for mtn bikers to reduce user conflicts on other systems. I understand the opposition to the trail system is concerned about the perceived changes to the character of the community. Long ago the opening of the golf course in Prineville did not change the character of the community to a bunch of preppy golfers and the development of a trail system will also not change the rural community character.
