Comments: Hello I support 100% the Lemon Gulch trail system opportunity.

Having lived in Oregon for 33 years I know that opening opportunities to access all the wonderful outdoor places is so important to keep alive. Developing sustainable outdoor access is always a good thing. I frequent the Ochocho forests as often as I can and always come back with a smile.

With the cooperation of the USFS and COTA and the Prineville community I'm sure a cohesive trail system can be developed. I just went and explored the Madras trails system and was impressed how they made a system that combined equestrian and MTB users and hikers.

So yes, please open the doors to the Prineville Lemon Gulch to all users.

Thank you

Andrew Deenik

Mountain Biker since 1985.
