Title:

Comments: Please choose alternative 2 (with 51miles of mtb trails). It provides opportunity for riders to visit, explore and enjoy this forest with minimal impact to other users.

Other alternatives offer a very small range of trail mileage - maybe 1 or 2 hours of riding max. This means the riding experience will be repetitive.

Please consider that riders of a given ability will tend to use the trails matching their ability ; example, the beginners would generally ride on the 8.9 miles for their ability and not go to the other sections. The experts can ride everywhere but will prefer trails that match their skills.

Having enough trails for different skill levels is important to create a recreational opportunity for riders to want to come back. It's more fun if you can ride diverse trails instead of always doing the same 1 or 2 hours ride.
