Comments: Mountain biking has been a very important part of my mental health and honestly without it times would be much harder than they already are. I am out in the Bend area mountain biking all summer long and with this development would add Prineville to my frequent trails. It helps the economy and so much more. So please take into account how important this sport is to the many local cities economies, families, mental health, and so much more. I urge you to allow the maximum miles of trails.

Thank you
