Title:

Comments: I am a 24 year resident of Central Oregon. I am an avid mountain biker, having moved here for that reason. I have seen the local trail systems blossom, with the area becoming a mountain biking destination known world-wide. Land-use managers and local non profits have done mostly an excellent job staying in front of the rapid growth in users on local trails. They have done this by spreading the tread across a growing network of trails in the region. I live in Sisters, but ride all over Central Oregon, including on the excellent trails in the Ochocos. This project will expand on that network and continue to build on our legacy trail system in Central Oregon. So please build more trails (Alternative 2), so that people might find and share gratitude, what better way to improve our community.
