Comments: I strongly support the creation of a motorless trail system in the Ochoco mountains. I have had a home in Central Oregon for nearly 20 years and have hiked and mountain biked in the Ochocos. They're a marvelous resource for the community but not well known or well used.

My introduction to the area was a ride over Lookout Mountain. Riding from the ranger house around Walton lake. Over Round Mountain. Amazing area but it was a ride that I needed a guide for.

A trail system will increase access and the benefits of the area with low environmental impact.
