Comments: I have been riding dirt, gravel and trail in Central Oregon for 30 years. The addition of new riding areas around Prineville is long overdue. This is a wonderful use of our high desert, has very little negative impact on the environment, increases recreational opportunities for area residents and will bring new and sustainable business to the Prineville and surrounding communities. There are over a dozen in our riding group that can't wait to ride these trails and this new area.
