Title:

Comments: I support development of the Lemon Gulch trail system. The trail system will spread out use at other crowded trail systems in Central Oregon, reducing user conflicts. The location will also provide a unique trail experience from what is currently available in central Oregon. Development of the trails will provide benefits for families and individuals to get outside and enjoy our National Forest lands in a healthy low impact way. I support full build out of 56 miles of trails at Lemon Gulch. The mountain bike community has proven to be good stewards of the land, contributing countless thousands of volunteer hours to maintain trails in partnership with land managers.
