Comments: Dear Ochoco National Forest,

I am writing in support of the Lemon Gulch trail network in the Ochoco National Forest. This project is clearly a well thought out and well studied proposal that will help meet the current and future needs of recreation in the Prineville community.

I come from a recreational community (not California, but Idaho) that offers many trails for all users. From my experience, having designated trails prevents erosion crepe and vandalism. This area can accommodate a wide variety of users without negative impact on hunting or grazing rights in the time frame of these activities. Plus, having a designated use area that can be monitored and maintained in a healthy and respectful is responsible land management.

I am a biker, hiker and horse back rider and look forward to having this area as another place to enjoy the outdoor life style.

Thank you,
